EDUCATION

University of Saskatchewan Saskatoon, SK

Bachelor of Arts and Science in Computer Science *2023-2028 (Expected)*

EXPERIENCE

Prompt Engineer | Outlier AI *10/2024 - 03/2026*

- Reviewed, debugged, and refined AI-generated code, with a focus on clean and functional Python logic, structure, and best practices.
- Crafted prompts and feedback to improve generated code quality and the model's understanding of programming tasks.

Store Associate | Dollarama *07 /2025 – Present*

Saskatoon, SK

- Provide customer service, organize and stock merchandise, receive inventory, operate a cash register, and follow workplace safety procedures.

PROJECTS

BookABook - Book Exchange & Lending System

Python, Django REST Framework, React, JavaScript, PostgreSQL

- Developed a full-stack platform for listing, searching, lending, and exchanging books, including user profiles, lending requests, return deadlines, and borrower ratings.
- Built the frontend with React and the backend API with Django REST Framework, using PostgreSQL for persistent application data.

Channel Q&A Forum – Full Stack WEB Programming

Next.js, React, TypeScript, PostgreSQL, Prisma, Docker

- Developed a full-stack forum with channels, threaded discussions, voting, file attachments, search, user authentication, and administrative functionality.
- Used Next.js API routes and PostgreSQL with Prisma ORM, and containerized the application and database workflow with Docker and Docker Compose.

Local AI Application - In Progress

TypeScript, React, Vite, Node.js, Fastify, Ollama, SQLite, Drizzle ORM, Vitest

- Developing a responsive full-stack application with a React frontend and Node.js/Fastify backend, integrating a local Ollama instruct model for AI-powered functionality.
- Using SQLite with Drizzle ORM for persistence and Vitest for testing, with access designed for desktops, tablets and phones over a private network.

Automotive Business Website - Client Project

JavaScript, HTML, CSS, JSON

- Developed a website for an automotive business selling vehicles and parts, building responsive pages and organizing vehicle and product information with JSON.
- Worked from customer requirements and feedback to refine the site's content and functionality.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, Java, Go, HTML/CSS, SQL

Frameworks / Web: React, Next.js, Django REST Framework, Node.js, Fastify, Vite

Databases / Tools: PostgreSQL, SQLite, Prisma ORM, Drizzle ORM, Git, Docker, Docker Compose, Linux/Unix, Vitest
