Education

Bachelor of Science in Computer Science

Sept 2023 – April 2027 (Expected Graduate date)

Profile

Motivated second-year student in computer science with a strong background in software development, data structures and programming. gaining practical expertise in fields like web development, algorithms and system design through school projects and independent study. passionate about developing teamwork, solving problems and always advancing technical abilities to create workable and adaptable solutions.

Academic Projects

Software Projects

- **Quiz Application with Auto-grading** - Designed and implemented a desktop quiz application with GUI and console interactions. Supported extensible question types, auto-grading functionality, and user-friendly interfaces.
- **Educational Game Development** - Developed a Python-based game aimed at enhancing learning through interactive gameplay. Focused on clean code, efficient algorithms and usability testing.

Summary of skills

Programming Languages

Python, C, Java, C++.

Technologies

MacOS/Windows/Linux, Microsoft Office, Git, Bash, VS Code, IntelliJ IDEA

Network Architecture and Protocols

TCP/IP, UDP, HTTP/HTTPS.

Work Experience and Extracurriculars

Prompt Engineer | Outlier AI

October 2024 – Present

- Specializing in crafting prompts to guide AI in generating clean and functional code. Involved in reading, debugging and refining code outputs while teaching the AI to improve its understanding of Python logic, structure and best practices.

Volunteer Note Taker | University of Saskatchewan

- Assisted peers in understanding programming concepts in C. Reviewed code for correctness, clarity, and adherence to best practices.

Residential Assistant | College & Wiggins Resident

September 2023 – Present

- Swiftly respond to emergencies, guiding residents to exits and ensuring full evacuation. Maintain safety by monitoring internet, assisting tenants, and addressing any concerns, fostering a secure and supportive living environment.
